

Hello!

Thank you for your interest in starting a **GCC Kids Global Gardening Club**! Your dedication to helping children access gardens, art and information about food democracy is essential in the work to support People, Planet and Peace over Profit.

The **GCC Kids Global Gardening Club Daily Guide** is designed to engage gardeners on a weekly basis, although scheduling the frequency of each club is up to the site and facilitators.

***Unit 1** will be the most flexible group of activities that can easily be designed for a bi-weekly or even monthly club.

***Unit 2** will require care of plants in containers, with activities that will be most effective when they take place on a weekly basis.

We hope these Activities & Materials aimed at children from toddlers to age 12 will help assist you in setting up your Club. These projects and materials are only meant to be a starting point, and can be expanded by the facilitator as needed. Please email kidsglobalgardens@gmail.com with your feedback about Unit 1 of the Daily Club Guide as the gardeners get their hands dirty and delve into the activities.

What are GCC Kids Global Gardening Clubs?

The objective of the GCC Kids Global Gardening Initiative is to help research, develop, establish and maintain GCC Kids Global Gardening Clubs & eventually GCC Global Gardens in South Los Angeles, creating a model for communities throughout the US & the world to help obtain food democracy.

What is the Global Climate Convergence?

The Global Climate Convergence for People, Planet and Peace over Profit is an education and direct action campaign whose kick-off occurred with “10 days to change course,” running from Earth Day to May Day 2014. It provides coordinated action and collaboration across fronts of struggle and national borders to harness the transformative power we already possess as a thousand separate movements. These grassroots justice movements are sweeping the globe, rising up against the global assault on our shared economy, ecology, peace and democracy. The accelerating climate disaster, which threatens to unravel civilization as soon as 2050, intensifies all of these struggles and creates new urgency for collaboration and unified action. Earth Day to May Day 2014 (April 22 – May 1) was the first in a series of expanding annual actions.

The Convergence creates a unifying call for a solution as big as the crisis barreling down on us – an emergency Green Economic Transformation through a Global Green New Deal including universal jobs, health care, education, food and housing security, economic and political democracy, demilitarization, an end to deportations, and 100% clean renewable energy by 2030. Clearly the time for action is NOW. To learn more about the Global Climate Convergence, please visit globalclimateconvergence.org.

The Global Climate Convergence is a non-partisan project of the Liberty Tree Foundation, a 501(c)3 organization.

To support the work of the GCC Kids Global Gardening Initiative, please Donate to the Global Climate Convergence!
